

Sean J. Taylor
Head of Rideshare Labs
Lyft

Sean J. Taylor is head of Rideshare Labs at Lyft, where he works on causal inference, experimentation, forecasting, and structural modeling. Previously, he led the applied statistics team in Facebook's Core Data Science team. He earned his PhD in Information Systems from NYU's Stern School of Business as well as a BS in Economics from Wharton School. He specializes in using machine learning, statistics, and randomized experiments for measurement, forecasting, and policy decisions. Sean's research spans a wide range of topics: online social influence, social networks, applied statistics, causal inference, and Bayesian modeling. He is also an avid engineer who enjoys putting research into practice by building software, such as his forecasting library Prophet.
